Summary

Bilingual (English & Bahasa Indonesia), diligent, and competitive person, I am overly committed to finishing my tasks and striving to be better than others. I love to learn new things. People call me "a jack of all trades" because I enjoy learning about various topics, especially on technology and sciences. When I am interested in a topic, I immerse myself in that topic to the point where I know I am confident that I can teach others on the subject.

Skills/Interests: JavaScript, React, Node.js, PostgreSQL, PHP, Python, Java, Android, Go (Golang), Firebase, Ant.Design, Bootstrap, CSS, HTML5.

Education

Bachelor of Computer Science (S.Kom.), Informatics	2016 - 2020
Universitas Pelita Harapan	
GPA: 3.63/4.00 Majored in Software Engineering	
International Baccalaureate (IB) Bilingual Diploma	2014 - 2016
Sekolah Pelita Harapan Lippo Cikarang	
Received the Bilingual IB Diploma (Indonesian & English)	
Cambridge & Cambridge IGCSE	2011 - 2014
Sekolah Pelita Harapan Lippo Cikarang	
Studied Cambridge and Cambridge IGCSE throughout middle school	

Work experience

Full Stack Developer	2021
PT. Rapi Utama Indonesia (Rapindo)	
Full Stack Developer for a fintech-based startup owned by the Indonesian Financial Services Association (APPI) developing new features and maintaining web apps based on Node.js (Backend), React + Ant Design (Frontend), and PostgreSQL (Database). The apps I am in charge of are currently being used by over 145+ top financial companies all around Indonesia and is endorsed by the OJK as the asset registry of choice.	
Freelance Web Developer	2021 - 2021
Developed a web app which utilizes Node.js, React, and PostgreSQL. Also worked on documenting and creating a user manual consisting of over 200 pages long for their web app that focuses on registering assets of collateral objects from finance companies and banks.	
ICT Intern - Full Stack Developer	2020 - 2021
Sekolah Pelita Harapan Lippo Village	
Developed the backend and frontend of administrative and financial web apps serving thousands of students using PHP and SQL Server on Microsoft Azure. Created a dashboard web app used for marking students' standardized tests, documenting, and analyzing students' learning over time. Collaborated with Corban University to develop a web based platform for online learning complete with an LMS, registration, and an online payment system. Also developed some websites for some teachers using WordPress. Technologies used: PHP, JavaScript, SQL Server, Microsoft Azure, Firebase, SNAP (Midtrans), Bootstrap, HTML, CSS.	

Projects

Sekolah Pelita Harapan Lippo Village: Centralized Student Progress Tracker in Language and Math (August 2020 - October 2020)
Designed and created a web app and dashboard for marking students' standardized tests, documenting, and analyzing students' learning over time. The visualized graphs give teachers quick feedback to improve learning and teaching. The accumulated data over time provides the school with considerations for the improvement of curriculum design. Tech: JavaScript, Firebase, Bootstrap.
JadyTrack [github.com/jamesadhitthana/JadyTrack] (January 2019 - December 2020)
Developed in Java (Android), Google Maps API, JavaScript (Web App), and Firebase, JadyTrack allows you or your loved ones to track and share the current LIVE location in real-time as easy as 1, 2, 3.
aerate - Indoor Air Quality Monitor & Dashboard [aerate.web.app] (September 2019 - July 2020)
Created for the university thesis, Aerate is a user-friendly, cloud-based cross-platform web application and hardware device that visualizes and informs the indoor air quality caused by exposure to dust particles, gasses, chemicals, and more. The application allows monitoring and visualizing indoor air quality in colorful, user-friendly graphics and even provides tips on increasing air quality. The app also acts as an alarm if an indoor pollutant passes a dangerous threshold. Technologies used: Arduino, C, JavaScript, Firebase, Bootstrap.
IB Survival Guide [ib.jamesgalaxy.com] (December 2017 - April 2020)

Information

Date of Birth: 11 June 1998

Hobbies: Photography, Cinematography, Reading, Tinkering, Games (RimWorld, Cities Skylines & CS:GO), Watching Documentaries

Skills

Indonesian (Bahasa Indonesia)	
Native Proficiency	
English	
Bilingual Proficiency	
JavaScript (Node.js & React)	
Developed web applications	
Java	
Developed Android and JavaFX Desktop apps	
PHP	
Developed multiple web applications	
Python	
Developed desktop apps using PyAutoGUI	
PostgreSQL	
Current preferred RDBMS	
Firebase	
Developed serverless Android and web apps	
Ant.Design / Bootstrap / HTML / CSS	
Developed websites and web apps	

Achievements

Photography Challenge Winner [2017]
- Pelita Harapan Photography Club (PHPC)
Won the photography challenge held by the Pelita Harapan Photography Club.
Photography Competition Third Place Winner [2015]
- Sekolah Pelita Harapan Lippo Cikarang: creARTive Art Festival 2015
Won third place in the photography competition against students from other schools.
Information Technology Excellence Award [2010]
- Sekolah Pelita Harapan Lippo Cikarang
Awarded the annual IT excellence award at Sekolah Pelita Harapan Lippo Cikarang.

Created a website where students can access tips on passing IB as well as view good examples of my assignments so that other IB students can get help for free and without ads. The site has also been referred multiple times by teachers from different schools for their students to use. The site used to have hundreds and sometimes thousands of visitors per month and good engagement (mostly comments and questions from other IB students) as I had good SEO.

Tuna Prediction [github.com/jamesadhitthana/TunaForecaster] (May 2019 - July 2019)

Forecasting Indonesia's Tuna location using Support Vector Machine through Python and Dash.

Ready2Drink [github.com/jamesadhitthana/Ready2Drink] (October 2018 - December 2018)

Ready2Drink is an Android app connected via Bluetooth to an Arduino that allows monitoring hot or cold drinks and receive notifications when drinks are "ready to drink".

Ducktionary [github.com/jamesadhitthana/Ducktionary] (October 2018-December 2018)

Desktop dictionary created using Material Design utilizing Java, JavaFX, and JFoenix

Sentiment Analysis and Forecasts on American Fast Food Restaurants

[github.com/jamesadhitthana/UPH_SentimentForecast] (September 2018 - November 2018)

Created a user friendly dashboard to find customer satisfaction in American fast-food restaurants and forecasted next year's satisfaction score using R and Shiny.

Volunteer

Fundraising July 2018

Yayasan Dutasia (Gerakan Peduli Antar Manusia)

Actively raised funds and donations in fundraiser events for families affected by leprosy.

Seminar Speaker: Orang Tua Zaman Now Melek Teknologi March 2018

Sekolah Don Bosco III

Spoke at a seminar on why and how parents must keep up with technology.

Volunteer Teacher and Team Leader October 2017

Yayasan Mandiri Kreatif Indonesia (YAMAKINDO)

Led, created, and hosted "Fun Typing" which is an event designed to teach the youth how to type.

Volunteer and Team Leader April 2017

Yayasan Kasih Anak Kanker Indonesia

Led, co-created, and hosted an event for children affected by cancer.

Volunteer Teacher and Team Leader January 2015 - June 2015

SDN Sukadami 02

Created lesson plans and taught primary school students English with other volunteers.

Volunteer and Team Leader June 2014 - June 2015

Panti Asuhan Komunitas Anak Maria Immaculata (KAMI Orphanage)

Helped orphanage children with homework and helped take care of the children.
